

i3BOARD WITH CAPACITIVE SENSE TECHNOLOGY

Bringing advanced touch screen user experiences to your meeting room

All i3 BOARDS offer the best of both worlds with a powerful touch interface combined with a durable whiteboard surface that has a lifetime warranty and a sleek, ultra-thin aluminium frame. This latest i3BOARD C-Sense is the first interactive whiteboard to use **Capacitive Sense Technology**.

Even if you have never heard of capacitive sense technology, you have been using it for quite some time now: just think about your smartphone or tablet touchscreens. A capacitive touchscreen works by sensing the conductive properties of an object, generally your fingertip's skin.

HOW DOES IT WORK?

A capacitive touchscreen uses the electrical properties of the human body. The **human body is conductive**, meaning electricity can pass through it.

So when you touch a capacitive screen with the tip of your finger (think of it as another electrical conductor), you cause a change in the screen's electrical field. Even the **slightest touch** of your finger will be measured.

A capacitive screen does not rely on pressure, making it **more responsive** than a traditional resistive screen with **unequalled user experiences** as a result.

C- SENSE TECHNOLOGY IN BUSINESS ENVIRONMENTS

Be in full control of your presentation environment

Whether at home, in learning or business environments, we are increasingly using touchscreens as a powerful communication aid. They have become as natural as a keyboard or a mouse.

The i3BOARD with C-Sense Technology helps create an **information-sharing environment** that ties in with this development. Furthermore, it provides an answer to everyone looking for new and innovative methods for **enhancing communication processes** and **visualising data**.

WHY OPT FOR AN i3BOARD WITH C-SENSE TECHNOLOGY?

Flicking, dragging, pinching and swiping: these gesture-based actions come naturally to most of us nowadays. The i3BOARD with C-Sense Technology incorporates capacitive sensing, making it **highly responsive**, as it does not rely on pressure. This fully capacitive whiteboard brings intuitiveness and interactivity to the meeting room.

Whether you're giving a high-profile presentation to potential investors or setting up a brainstorm with your team to develop new ideas, you will be in **full control of your presentation environment**. The i3BOARD with C-Sense technology is the next step in using innovative presentation technology to its fullest potential.

Main features

- Multi-user interaction and up to 30 touch points
- Extremely precise
- Fast response
- Very sensitive: even the slightest touch can register an input
- No ghosting
- No shadow issues
- Excellent optical performance (high transmissivity)
- High durability
- Platform independent
- Increased product life span
- Finger touch or stylus only
- Standard wall-mount included

Duo-surface capabilities

- Excellent visibility
- Superior projection
- No shadow issues

Appearance

- Ultra-narrow aluminium frame
- Sleek
- Enhanced look and feel
- Easy maintenance
